City of Duluth RFP No. 13-08DS

Design of Construction Documents for 10th Avenue East from Superior to 5th Street

City Project No. 0753TR

S.A.P. 118-148-020

Addendum #1

The following is to be included in the scope of work of the Request for Proposal No. 13-08DS:

1. 10th Avenue East is to be designed as a **10 ton road**.
2. A **Project Memorandum** is to be prepared by the Consultant according to the MnDOT project development process.
3. There will be a **pre-bid meeting**. Consultant and City will host the meeting.
4. **Traffic study** and recommendations will be done for intersections with existing signals (1st, 2nd and 3rd Streets), **in addition** to the 4th Street intersection. Consider needs for lane layout and turning control at the signals.
5. The south project limit is assumed to be at the north edge of Superior Street. Include connection of the 10th Avenue East water main to the Superior Street water main, in the middle of the west-bound lane. Full reconstruction of the Superior Street intersection is assumed to be done in a future Superior Street reconstruction project.
6. The north project limit is assumed to be in the middle of the 5th Street intersection, including connection of the 10th Avenue East water main to the two 5th Street water mains.

Historical mapping has been found for the design corridor. We have the DSGW District Plan for St. Luke's available. Contact me and I can e-mail this information to you.

Thank you for your efforts in responding to this Request for Proposal.
